Gamma NIV2 Firefighter Overtrousers - Blue Triple Trim

Description

The Gamma blue intervention overtrousers with Triple Trim reflective bands are designed for firefighters and fire safety professionals. Certified to EN 469 Level 2 standard, they provide a high level of protection against heat, radiant and convective heat, flames, and moisture, while ensuring comfort, durability, and freedom of movement during operations. Their high-performance 3-layer construction delivers excellent thermal insulation and mechanical resistance, making them suitable for demanding firefighting and emergency response situations.

Key features

- EN 469 Level 2 certified
- Protection against heat, flames, and water exposure
- Durable and breathable 3-layer construction
- Reinforced knees for high abrasion resistance
- Adjustable and removable shoulder straps
- Side openings for easy boot access
- 50 mm Triple Trim reflective bands
- Designed for operational comfort and mobility

Technical composition

- Outer fabric: 81% Kermel®, 18% para-aramid, 1% antistatic □ 225 g/m²

High resistance to flames and thermal stress.

- Membrane: Aramid + PTFE bi-component membrane □ 140 g/m²

Waterproof and breathable barrier with added protection against liquid penetration.

- Thermal lining: Para-aramid, meta-aramid, viscose + antistatic □ 200 g/m²
Lightweight insulation providing comfort and heat protection.
- Knee reinforcements: Kermel® + antistatic □ 275 g/m²
High resistance to abrasion, heat, and mechanical stress.
- Anti-wicking barrier: Modacrylic / cotton with FR polyurethane coating □ 350 g/m²
Prevents moisture penetration in critical areas.

General specifications

- Triple Trim reflective bands (yellow / grey / yellow □ 50 mm)
- Sizes: 1 to 4
- Lengths: C, M, L, XL
- Color: Blue

Design details

- Wide removable shoulder straps, crossed in the back with quick adjustment system
- Semi-elastic waistband for improved comfort
- Hook closure and fly fastening
- Side zip openings under flap for boot access
- Reinforced knee panels in durable fabric
- Grey piping above reinforced areas
- Ergonomic cut for firefighting operations

Caractéristiques

- Norme : NF EN 469 + A1 : 2020
