Lath-cutting gaff with wooden handle 2 x 2 metres

Description

The lath-cutting gaff is the multi-purpose tool for firefighters.

With a total length of 4 meters, the lath-cutting gaff can be used to knock down rubble, lift, perforate or dismantle false ceilings or partitions, and quickly cut small diameters.
Its use enables safe handling of potentially dangerous elements, reducing the risk of accidents on work sites.

Its two 2-meter-long wooden handles can be joined together to form a total length of 4 meters, facilitating access to tight spaces, offering precision and efficiency.

Caractéristiques

- Matériau tête : acier galvanisé
- Matériau manche : bois
- Dimension manche : 2 x 2 mètres
