FLAMMENFLEX hose with couplings GFR 20 high pressure 40 bar

Description

Flammenflex GFR 20 high pressure 40 bar fire hose is a high-quality fabric hose. It is light and flexible in use, with excellent abrasion resistance. It is used by fire-fighters for fire-fighting, and is equally suitable for forest fires and for urban or industrial fire-fighting.

Flammenflex high pressure 40 bar hose is highly visible thanks to its fluorescent yellow color. Lightweight, supple and flexible, it resists abrasion, as well as many chemicals and seawater. Its design generates low pressure losses. Flammenflex GFR 20 hose is cold-resistant to -30°C and heat-resistant to +100°C.

Flammenflex hose complies with standards NFS 61112, DIN 14811, PREN1924-1, EN14540.

It requires no special maintenance and can be repaired by hot vulcanization. It can be supplied on request with customized marking or anti-leak sleeves.

Technical specifications

- Construction: Textile casing and laminated rubber inner hose
- Thickness: 1.7 mm
- Construction: high-strength polyester casing, reinforced circular weave
- Inner layer: Double EPDM rubber coating (high quality)
- Color/markings: Fluorescent yellow with blue-red-blue stripes
- Equipped with GFR 20 high pressure 40 bar bronze crimped half-couplings

Caractéristiques

- Length : 20 m
- Poids au mètre : 130 g
- Pression maximale d'utilisation : 40 bars
- Pression de non éclatement : 90 bars
