WATERMASTER floating motor pump

Description

The WATERMASTER floating motor pump from ICONOS offers a versatile, powerful solution for a wide range of applications: whether flooding, heavy rain or severe weather, it ensures fast, reliable water evacuation to limit damage.

It's ideal for draining wastewater from cellars, rivers, lakes, ponds and agricultural fields, but also for holding back fire-fighting water.

Thanks to its robust design and ease of use, the WATERMASTER floating pump meets the highest standards of safety and efficiency, even in difficult conditions.

Technical specifications :
- 8 HP Kohler four-stroke engine with pull starter.
- Weight: 42 kg (with full fuel tank).
- Dimensions: Body diameter 800 mm, height 510 mm
- Pump inlet: 80 mm
- Hose connection: 6 inches
- Hose weight: 4.5 kg for 30-meter length
- Pump capacity: 3,200 l/min at 1.5 m head (192 m³ per hour)
- Pump body: Plastic
