

ALUMINIZED FIREFIGHTING KIT WITH SIMPLIFIED OVERBOOTS

<https://www.securhit.com/en/body-protection/1055-ensemble-intervention-incendie-aluminise-avec-surbottes-simplifiees.html>

Aluminized firefighting kit with simplified overboots

Description

This aluminized intervention suit provides maximum protection against enveloping flames, intense radiant heat (close to and through fire) and specific high-risk firefighting and rescue operations. Ideal for firefighters, it provides complete protection, especially when wearing SCBA.

SPECIFICATIONS :

- Suit with back pocket for SCBA. Zipper under flap with hook-and-loop closure, from groin to overhead. Fully lined in flame-retardant cotton. SCBA can be worn with a valve protrusion at chin level.

- Steelworker-type fiber helmet with adjustable cap. 2 curved polycarbonate screens, size 250x150mm: 1 clear, 3mm inside, 1 gold, 1mm outside, to reflect radiant heat. All seams KEVLAR thread.

- Pairs of simplified overboots.

Aluminized overboots with aluminized upper lined in 100% flame-retardant cotton with insulating interlayer between aluminized fabric and lining.

Multi-layer insulating soles for walking on soils up to 400°C.

Back opening and tab closure on each overboots with ankle support straps and KEVLAR thread seams. Overboots designed to be worn with shoes (one size fits all).

- Pair of aluminized gloves with KEVLAR thread stitching, 40 cm long, one size 10/11.

COMPOSITION

Fireshield complex: Aluminized aramid fabric 300 gr/m² - Carbon felt insulation 320 gr/m² - Aluminized glass fabric 135 gr/m² - Flame-retardant cotton 185 gr/m².

Lined with 100% flame-retardant cotton.

Available in sizes M to XXL.
