Collapsible flexible utility tray FASTER

Description

The FASTER drip tray is designed for the safe reception of hazardous liquids, but is also suitable for maintenance and cleaning work, or the storage of contaminated materials.

Easy to set up thanks to its flexible structure, its stability is ensured by welded corners and polypropylene reinforcements.

Made from coated PES/PVC fabric, it is resistant to a wide range of hazardous liquids such as acids, alkaline substances and petroleum products.

Technical specifications:

- Temperature range: -30°C to +70°C
- Straps with clips for easy storage and transport.
- Eyelets in each corner for hanging.
- Suitable for indoor and outdoor use.
