

## ASAP FALL ARREST

<https://www.securhit.com/en/pulleys-and-ascenders/109-antichute-asap.html>

Mobile fall arrester on rope.

## Description

With its unique locking system, the ASAP is a benchmark in fall protection for workers at height. In normal use, the device moves freely on the rope, without any manual intervention, to accompany the user in his movements. In case of impact or sudden acceleration, the ASAP locks onto the rope and immobilizes the user.

It offers permanent protection against falls because it stops uncontrolled falls, slips and descents, it works on vertical or oblique ropes and locks onto the rope even if the device is grabbed during the fall.

It is easy to install and uninstall at any point on the rope.

## Caractéristiques

- Weight : 295 g
- Materials : Aluminium et acier inoxydable
