Aluminum Strainer with Basket - Pump Suction Filter - DN40 / 65 / 100

### Description

The aluminum strainer with basket is designed to provide effective filtration for pump suction and fire-fighting vehicles. It protects pumps from debris and foreign objects, ensuring optimal performance and extended service life.

This strainer is compatible with fire-fighting fittings, including symmetrical and Storz types, making installation easy on various hydraulic equipment. Lightweight and durable thanks to its aluminum basket, it is ideal for fire-fighting, irrigation, and water transfer applications.

#### Key Benefits

- Efficient pump suction filtration
- Easy installation with symmetrical or Storz fire-fighting fittings
- Lightweight and durable aluminum construction
- Suitable for portable pumps, fire pumps, and hydraulic equipment

#### Technical Specifications

- Material: Aluminum
- Available diameters: 40 mm, 65 mm, 100 mm
- Mounting type: Compatible with symmetrical or Storz fire-fighting fittings

### Caractéristiques

- Material : Aluminium
- Available diameters : 40, 65 et 100 mm
