

J15W 230V ELECTRIC PUMP WITH DSP40 COUPLING

<https://www.securhit.com/en/dewatering-pumps/1124-electropompe-j15w-230v-avec-raccord-dsp40.html>

J 15 W submersible electric drainage pump with DSP40 fittings

Description

The J15W electric pump is designed to treat wastewater containing light abrasives. Its light weight and compact design make it easy to transport, handle and install.

A double oil-lubricated mechanical seal with primary and secondary seals in silicon carbide on silicon carbide seal ensures long pump life. The double outer casing and good heat convection enable the pump to operate even run dry without damaging the motor.

An integrated contactor connected to the thermal sensors in the stator windings protects the motor from overheating and offers an automatic restart function.

Technical specifications:

- Max immersion depth: 20 m
- IP 68 protection
- Maximum temperature of pumped liquid in continuous operation: 40°C
- Maximum density of pumped liquid: 1100 kg/m³.
- PH of pumped liquid: 5 - 8
- Maximum number of starts: 30/hour
- Motor : 230 V CV 50 Hz

Caractéristiques

- Weight : 18 kg
