Carrying bag for fire-fighting equipment BAG 4H

Description

The BAG 4H backpack is specially designed to hold 4 DN25 hoses of up to 30m in length, a split and two fittings.

It has a large-capacity inner compartment separated by a plastic panel with securing straps to hold the hoses securely in place. The plastic panel is removable.

Technical specifications:

- Made from extra-strong Cordura® fabric
- Padded, adjustable shoulder straps for extra comfort
- Back cushion
- Reflective strips on the sides for greater visibility

Optional accessories :

- Water bottle holder: attaches directly to the bag. Holds a water bottle of up to 2 litres. Velcro fastening and reflective strips.
- Zipped pocket: attaches directly to the bag. Ideal for storing small items. Dimensions: 175 x 145 x 70 mm. Weight 120g.

Caractéristiques

- Dimensions : 400 x 650 x 220 mm
- Weight : 1.9 kg
