PANTHER fire hose and equipment carry bag

Description

Practical and compact, the PANTHER backpack is designed to hold 5 x 20 m DN25 hoses, 1 divider, 2 fire hoses and 2 fittings.

It has a large-capacity internal compartment, divided into two parts by an integrated divider.
Once the rucksack has been emptied, all the dividers can be removed and stored at the bottom of the main compartment, allowing you to use the free space to carry a variety of equipment - such as bottles of water, food rations or used hoses after an incident.

Reflective strips are integrated into the front and sides of the backpack to ensure optimum visibility in intervention conditions.

Technical specifications:
- PVC-coated Cordura® fabric
- Fully adjustable shoulder, waist and chest straps
- Fixings for a radio and microphone on the shoulder straps
- Back cushion for extra comfort
- Carry handle

Two optional accessories available:
- Water bottle holder: attaches directly to the bag. Holds a water bottle of up to 2 litres. Velcro fastening and reflective strips.
- Zipped pocket: attaches directly to the bag. Ideal for storing small items. Dimensions: 175 x 145 x 70 mm. Weight 120g.

Caractéristiques
