NEPTUNE CO2 training extinguisher

Description

The NEPTUNE is a rechargeable training extinguisher designed for practising extinguishing procedures under realistic conditions.

Thanks to its clamping handle and interchangeable nozzle (flat or round), it makes it easy to switch from foam extinguishing to CO2 extinguishing by simply adjusting the nozzle.

Operating with water and air, it reproduces the effect of CO2 without emissions, offering an economical and environmentally-friendly solution. It's easy to fill, either manually or using the Neptune system. It comes with magnetic plates in 6 languages for optimum adaptation to training needs.

TECHNICAL FEATURES :

- Equipped with an automatic valve and a filling connector on the hose.
- 6-litre filling capacity
- Supplied with a flat or round CO2 cartridge
- Includes: magnetic plate and stickers for foam, CO2 and powder in 6 languages

Caractéristiques

- Volume : 6 L
