Mobile hose reel for DN70 hose, 200 m capacity

Description

Standard mobile hose reel designed to store and transport 200 m of DN70 flexible hose. It consists of a frame with a fork to secure it to the vehicle, together with locking hooks. Its large drawbar makes towing easy.

The reel incorporates a reel braking device and a rolling brake. It stands on two solid wheels with rubber tyres clamped between two flanges, and has two feet for stability when parked.

Made from polyester-coated steel, it comes with optional winding feet to simplify this operation when lying down, as well as a splitting support.

Caractéristiques

- Dimensions : 949 x 840 x 1335 mm
- Weight : 70 kg
