International version of the PETZL ASTRO harness

Description

The ASTRO harness has been specially designed for professionals working in difficult rope access situations.

Its ergonomic and technical design means it can meet the demands of moving around and ascending vertically.

Featuring 3D padded foams and a semi-rigid structure at the waist and thighs, it offers optimum comfort throughout the work. Its openable ventral attachment point makes it easy to install the equipment needed for rope work, while the integrated CROLL L rope clamp improves performance during ascents.

The waistbelt features metal side attachment points, gear loops and tool loops, making it easy to organise and transport all the gear you need. Finally, the openable FAST buckles and DOUBLEBACK self-locking buckles ensure quick donning and precise adjustments, even when wearing gloves.
