ATRAX 11.6 MM pruning rope by COUSIN

### Description

The ATRAX abseiling rope from COUSIN is specially designed for use in pruning work. Made up of 24 polyester strands, it stands out for its performance and its design adapted to rope locking devices.

Its particularly fine splice makes it easy to thread the rope through most pliers. Its bright colour enhances visibility in working conditions, while its sheath makes slipping almost imperceptible. Even when exposed to moisture, it retains its shape perfectly.

With a very low elongation of just 2.8% and a breaking strength of up to 29 kN, ATRAX rope combines robustness and reliability. It is available with a splice at one or both ends, as required.

Technical specifications:

- Diameter at 10 kg: 11.6 mm
- Weight per metre at 10 kg: 102 g/m
- Number of falls: ? 5
- Impact force: 5.5 kN
- Static elongation from 50 to 150 kg: 2.8 %
- Breaking strength: ? 29 kN
- Percentage of core: 45 %
- Percentage of sheath: 55 %
- Nouability: 1.03
- Water shrinkage: 0.5 %
- Sheath slippage: 0 %
- Number of sheath spindles: 24 braided spindles

- Material: 100 % polyester

Colours and splices on request.
