Semi-static pruning rope FRAZEN 12.2 mm by CAMP

### Description

Thanks to its innovative braided core and robust 16-ply sheath, FRAZEN 12.2 mm semi-static rope offers excellent strength, low elasticity and easy handling.

Made entirely from polyester, it considerably reduces the effects of moisture and dust, which are often a problem with polyamide ropes.

Available in a range of lengths, it features a looped end made using a revolutionary splicing system, guaranteeing a compact loop that passes easily through mechanical Prusik devices.

Technical specifications:

- Weight: 105g/m
- Static strength: 30kN
- Static strength with belay in 8: >15 kN
- Fall factor 1 (100Kg): >5
- Impact force (fall factor 0.3): 5.7 kN
- Static elongation 50/ 150 kg: 2.4 %
- Sheath slippage: 0%
- Sheath: 58 %
- Core: 42 %
- Water shrinkage: 0.2 %
- Material: Polyester

## **Caractéristiques**

- Norme : CE EN 1891 type A
