EDELRID WOODPECKER 11.7 mm static pruning rope

Description

WOODPECKER pruning rope combines flexibility, easy splicing and compatibility with self-braking descenders.

Its particularly rough sheath ensures an excellent grip, even in difficult conditions, while its bright colour improves visibility and safety during work.

Thanks to the Thermo Shield treatment, the rope is pleasant to handle, offering appreciable comfort in use.

Its sheath is made from heat-shrunk polyester twisted yarns, giving it excellent abrasion resistance and minimal shrinkage. The special core-sheath braiding integrated into the core makes it virtually dimensionally stable, while making splicing much easier.

Technical specifications:

- Core content: 45 %
- Diameter: 11.70 mm
- Nouability: 0.80
- Sheath content: 55 %
- Weight per metre: 95 g/m
- Minimum breaking load: 25 kN
- Static elongation: 2.1 %
- Minimum breaking load with figure-of-eight knot: 16 kN
- Material: Polyester / Polyamide
- Type of rope: Static a

Caractéristiques

- Certification : EN 1891 Type A
