INTERSTATIC PROTECT 11 mm rope from EDELRID

Description

INTERSTATIC PROTECT rope has built-in cut protection thanks to the incorporation of high-strength aramid fibres in the sheath during braiding.
This technology makes it almost twice as resistant to cuts as conventional ropes of the same diameter and construction.

It is distinguished by :
- Low elasticity and excellent performance under load.
- Long-lasting flexibility thanks to the Thermo Shield treatment.
- Compatibility with all descenders and rescue devices.
- Diameter marker wires on the sheath.

Technical specifications:
- Core content: 56 %
- Diameter: 11 mm
- Nouability: 1.10
- Sheath content: 44 %
- H2O shrinkage: 2.40 %
- Weight per metre: 77 g/m
- Minimum breaking load: 35 kN
- Static elongation: 2
- Minimum breaking load with figure-of-eight knot: 20 kN
- Material: Polyamid/Aramid
- Type of rope: Static a

Caractéristiques

- Certification : EN 1891 Type A
