PILATUS work shoes from PFANNER

Description

The PILATUS shoe is designed for professionals working in high-risk environments such as forestry, steep terrain and vertical interventions.

This model is distinguished by its patented rivets, which provide a continuous and extremely stable link between the outer material, the class 2 cut protection (EN 17489) and the rockfall protection. This unique design guarantees lasting structural strength, even in the toughest conditions.

Its aluminium toe cap ensures safety against head-on collisions, while the rubber rockfall protection enhances resistance in rough terrain.

Equipped with a waterproof Sympatex membrane and a breathable Cordura lining, the PILATUS shoe offers optimum comfort in all seasons. The Vibram sole absorbs shocks effectively and provides excellent grip, even on unstable surfaces.

The riveted round eyelets have been specially designed for climbing: they enable solid lacing without damaging the ropes, making the Pilatus an ideal shoe for both ground work and vertical progression.

Technical specifications :

- Class 2 cut protection / Complies with standard EN 17489
- Lightweight, hard-wearing aluminium toecap
- Integrated rubber rockfall protection
- Patented riveting permanently bonds outer material, cut protection and stone guard
- Riveted round eyelets: suitable for climbing, without abrasion of the ropes

- Vibram sole: non-slip and shock-absorbing
- Sympatex membrane: waterproof and breathable
- Cordura inner lining: comfort, resistance and breathability
- Upper material: high-quality natural leather
