DRAGON TOP fall arrest torso by BEAL

Description

The DRAGON TOP is a lightweight, adjustable torso designed to complement your fall arrest equipment. Y-shaped, it provides vertical support in the event of a fall, guaranteeing comfort, mobility and safety. Designed to be used alone or in conjunction with the DRAGON harness to form a complete protection package, it is also optimised for vertical rescue operations.

TECHNICAL FEATURES :

- 2 fall arrest attachment points for extra protection in the event of a fall.
- Fully compatible with the DRAGON harness to form a complete system for working at height.
- Attachment for rope clamp: Equipped with a strap for fitting the HOLD UP rope clamp, essential for rope access operations.
- Easy vertical evacuation: Each shoulder strap can be clipped at shoulder level, for safe lifting during rescues.
- Textile back point: Reduces friction and discomfort in narrow passages, making movement more fluid.
- Ergonomic shoulder straps: narrowing at the neck prevents chafing and increases comfort during prolonged use.
- Accessories: 1 ring for handles and 1 equipment holder on each shoulder strap.
