ORIENT EXPRESS one-way screwgate carabiner

## Description

Specially designed for belaying, the ORIENT EXPRESS is a unidirectional screw-lock carabiner that guarantees optimum positioning. Its retaining finger captures the belay ring of the harness, preventing it from turning over and ensuring that you always work in line with the axis.

This system eliminates the risk of weakening the belay chain. Compact, reliable and easy to handle, it offers a high level of safety for climbing, mountaineering or working at height. Available in three different colours on request: orange, blue and green.

## Caractéristiques

- Norme : EN 12275 : 2003
