KRATOS SAFETY XIMO 2 fall arrest harness

Description

The XIMO 2 is a top-of-the-range fall arrest harness, specially designed to offer safety, support at work and optimum comfort. Featuring an integrated "comfort" belt, it is perfectly suited to work at height requiring freedom of movement and excellent ergonomics.

Attachment points :

- 1 dorsal attachment point: for connection to a conventional fall arrest system (rear fall).
- 1 sternal hook: made up of 2 strong textile loops, suitable for front connection to a fall arrest system.
- 2 Side thimbles: for holding on to work via a positioning lanyard.

Technical specifications:

- 30 cm extension strap: makes it easier to connect to the back support without external assistance, increasing autonomy and speed of use.
- Adjustable shoulders, thighs and waist belt via automatic buckles: precise, intuitive adjustment to suit different body shapes (sizes S to L).
- Integrated work support belt: provides excellent lumbar support for prolonged operations.
- Extremely comfortable back protection: reduces fatigue and improves comfort when suspended.
- Optimally positioned buttock strap to reduce pressure points and provide greater comfort when suspended.
- Distinctive shoulder and thigh straps: different colours for quick, error-free donning.
- Numerous carrying features: 4 tool loops on the waistbelt, 3 tool rings for securely attaching karabiners and accessories and 2 triangles on the shoulder straps.

Suitable for users weighing up to 140 kg.
Complies with standards: EN 361:2002 and EN 358:2018.

Caractéristiques
