KRATOS SAFETY roofing kit/ complete fall arrest solution for work at height

Description

Designed for professionals working on pitched or flat roofs, the Roofing Kit contains all the essential equipment for effective fall protection that complies with current safety standards. Ready to use, this kit combines comfort, safety and practicality for fast, reliable use.

CONTENTS OF THE KIT :
1. POINT FALL ARREST HARNESS WITH BELT - Ref. FA 10 203 00
Safety harness equipped with two attachment points (sternal and dorsal), allowing connection adapted to the configuration of the worksite.
- Integrated support belt for work requiring secure positioning.
- Adjustable buckles for optimum fit.
- Complies with standards EN 361 and EN 358.

1. SLIDING ANTICHECK WITH ENERGY ABSORBER - Ref. FA 20 102 15
Complete linking device with integrated absorber to reduce energy in the event of a fall.
- 15-metre braided polyamide rope with a diameter adapted for easy handling.
- Sliding belay support for smooth movement along the rope.
- Complies with standard EN 353-2.

1.STEEL SCREW-IN CONNECTOR - Ref. FA 50 101 17
Robust, zinc-plated steel safety carabiner with screw locking system.
- 18 mm opening suitable for common anchor points.
- High tensile strength: 23 kN.
- Complies with standard EN 362.

1. SANGLE ANCHORING RING - Ref. FA 60 005 20
Versatile 2-metre anchoring strap for creating temporary anchorage points.
- 20 mm wide in high-strength polyester.
- Suitable for a variety of structures (beams, posts, frameworks).
- Complies with standard EN 795 type B.

1. TRANSPORT BACKPACK - Ref. FA 90 115 00
Compact, functional bag for storing and transporting the entire kit.
- 12-litre capacity with external zipped pocket.
- Durable design for intensive use on site.

Caractéristiques

- Poids de l'ensemble : 4.68 kg
