COURANT CHEROKEE harness

Description

Robust and ergonomic, the CHEROKEE harness is designed for rescue operations and work at height. Made from the finest materials on the market, it meets the most demanding requirements in terms of safety, adaptability and comfort.

Its innovative multi-size adjustment system makes it easy to adjust the distribution of straps between the upper (red) and lower (blue) sections. This design guarantees a perfect fit for all body sizes, optimising comfort and safety.

Technical specifications:

- GVWR: 140 kg
- Individual serial number (ITN): traceability guaranteed via a specific label
- Self-locking aluminium buckles: Ensures quick, reliable and secure fitting with no risk of slipping.
- Back fastener: for connection to fall arrest systems.
- Multi-axis circular seams: reinforce the harness's resistance in all directions of use.
- Intuitive adjustments: the straps adjust downwards, making adjustment easy even when wearing gloves or in difficult conditions.
- Clear colour coding for intuitive donning.

CE EN361 and CE EN1497 certified
