Connector AXXIS TL de COURANT

Description

The AXXIS TL is an oval carabiner in zicral aluminium, designed to meet the most stringent requirements in terms of safety, robustness and ergonomics. Thanks to its innovative new design, it has a large 21 mm opening, making it easy to use with ropes, pulleys or safety equipment, even in difficult conditions.

Featuring a Triple Lock locking system, it requires three successive actions to open: push, turn, then pull the finger. This mechanism significantly enhances safety by preventing accidental opening, while remaining fluid to use for professionals and experienced practitioners alike.

Technical specifications:
- Optimised oval shape for better positioning of equipment (pulleys, rope clamps, descenders).
- Triple Lock: maximum security with opening in three movements.
- Material: Zicral aluminium, combining lightness and strength.
- Dimensions: 110 mm (L) x 62 mm (W)
- Finger opening: 21 mm
- Weight: 82 g
- Large axis resistance: 2200 daN
- Small axis resistance: 750 daN
- Individual engraved serial number (ITN) for full traceability.
