PROTOS Inuit jacket for men

Description

The PROTOS Inuit Jacket is an ideal solution for professionals looking for comfort, protection and visibility, while working in varied and often difficult conditions. Designed using high-quality materials and innovative technologies, this jacket combines robustness, resistance and optimum comfort.

Technical specifications:

- Outer fabric: Knitted from robust jersey and impregnated to protect against dirt.
- Inner fabric: Soft flannel for superior all-day comfort. The rough inner side feels great and helps prevent dampness, while providing excellent thermal support.
- Reinforcements: Water-repellent shoulders for extra protection against moisture and the elements. Reinforced elbows for greater abrasion resistance and durability in the most heavily used areas.
- 3CON Reflex on the back of the jacket ensures maximum visibility even in low-light conditions, so you can work safely.
- High collar and extended back provide effective protection against the cold and bad weather, ensuring optimum retention of body heat.
- Practical pockets: The Zipp2Zipp® pocket system provides secure, accessible storage for your tools and personal belongings. Extra-deep internal pockets for extra storage, perfect for carrying items while remaining within easy reach.

Several colours available on request.
