

SMALL PPE WASHING MACHINE

<https://www.securhit.com/en/ppe-accessories/1212-machine-de-lavage-pour-petits-epi.html>

Washing machine for small PPE

Description

Specially designed for cleaning ARICO helmets and masks, this machine combines cleaning performance with respect for fragile equipment. Its double-shell 304 stainless steel chassis guarantees optimum resistance to wear and corrosion.

Thanks to a fixed jet system, the equipment remains perfectly in place during the wash, avoiding any impact or damage. At the end of the cycle, the basket automatically rises to worktop level when the lid is opened, offering remarkable ease of use.

Technical specifications:

- Washing capacity:

Up to 8 ARICO masks

2 helmets

- Power supply: 3-phase 400V / 50Hz / 3+N

- Products used: 10 litres of solution for approximately 400 washes

- Washing and rinsing pumps: 2 x 1 HP

- Adjustable temperature:

Washing up to 60°C

Rinsing up to 80°C

- Automatic tank filling

- Basket dimensions: 500 x 500 mm

- Integrated lift pump: can be emptied up to a height of 700 mm

- Ergonomic mobile bin: automatically lifts up at the end of the cycle

- User safety: stops immediately when the door is opened

- Automatic dosage of washing and rinsing agents
