

WASHING MACHINE FOR LARGE DIMENSION PPE

<https://www.securhit.com/en/ppe-accessories/1214-machine-de-lavage-pour-epi-grande-dimension.html>

Washing machine for personal protective equipment

Description

Designed for efficient cleaning of large PPE, this machine is ideal for washing bibs, bottles, helmets, masks and SCBAs.

Its double-jacketed 304 stainless steel chassis guarantees robustness and durability, even in intensive environments.

Thanks to its pressure-maintaining system, it cleans bibs and SCBA frames thoroughly. The rotating jets provide an even spray over all surfaces, ensuring thorough cleaning from any angle.

Key features:

- Washing capacity:

Up to 10 masks

4 helmets

4 SCBAs

4 cylinders or 2 SCBAs + 2 cylinders

- Power supply: 3-phase 400V / 50Hz / 3+N

- Product consumption: 10 L of solution (wash or rinse) for approximately 400 cycles

- Wash/rinse pumps: 2 x 1 HP

- Heating: Stainless steel boiler with safety thermostat

- Washing up to 60°C

- Rinsing up to 80°C

- Tank filling: automatic

- Basket dimensions: 550 x 600 mm

- Gravity drain: max height 200 mm

- Wash and rinse arms: stainless steel (top and bottom)

- Safety: automatic stop when door is opened

- Automatic dosage of wash and rinse products

- Option: bib pressure maintenance system (oxygen or breathing air connection)

- Certification: Complies with CE standards

OPTIONS

- Pressure maintenance
- Wash basket for 4 bottles
- Bib holder basket (4 SCBAs)
- Additional basket (saves time)
- External support for washing and rinsing products (machine or wall mounting)
- External bottle holder (machine or wall-mounted)
- Effluent treatment
- Touch screen for customising a multitude of wash cycles to suit your PPE
- Connection to your air network
- Rinsing agent (disinfectant or not) and washing agent
- Water softener

Caractéristiques

- Dimensions : 700 x 780 x 1930 mm
- Puissance max. : 6.6 kW
- Capacité de cuve : 40 L
- Consommation d'eau par cycle : 4.5 L
