230V Adapter with 30 mA Protection - Electrical Safety

Description

The 230V adapter is a high-safety electrical connection accessory, designed to provide reliable power to your equipment on construction sites or in workshops.
Equipped with a 230V male plug and a 230V female plug with 30 mA residual current protection, it ensures maximum safety against short circuits and current leakage.

Technical Features:
- Rated voltage: 230V
- Residual current protection: 30 mA
- Connection: 230V male plug / 230V female plug
- Robust design and enhanced safety for professional use

The 230V adapter with 30 mA protection is the reliable and essential solution for a safe, high-performance, and standards-compliant electrical power supply.
