6L Water + Fluorine-Free Additive Fire Extinguisher - NF Certified Performance for Optimal Protection

Description

The 6-litre water spray fire extinguisher with fluorine-free additive is the ideal solution for effectively fighting Class A and B fires.
Designed for professional, industrial and public-access environments (ERP), it offers excellent extinguishing performance while meeting environmental requirements thanks to its fluorine-free additive (MBK LIQ FFC premix).

Certified according to NF EN 3-7+A1 (February 2008), this extinguisher guarantees reliability, regulatory compliance and maximum safety.

Technical characteristics:
- Extinguishing agent: Water + fluorine-free additive
- Additive: MBK LIQ FFC premixed
- Capacity: 6 L
- Auxiliary gas: Nitrogen
- Pressurization: Stored pressure 15 bar
- Fire rating: 13A 113B
- Operating duration: 29.88 s
- Operating temperature: +5°C to +60°C
- Standard: NF EN 3-7+A1 (02/2008)
- Vehicle bracket: No

Fluorine-free ecological extinguisher:

In a regulatory context with increasingly strict rules regarding fluorinated agents (PFAS), this water extinguisher with fluorine-free additive is a responsible and sustainable choice. It meets current environmental requirements without compromising performance.

Caractéristiques

- Volume : 6 Litres
- Certification : NF EN 3-7+A1 (02/2008)
- Classe de feu : 13A - 113B
