9L Water + Fluorine-Free Additive Fire Extinguisher High Performance NF Certified

Description

The 9-litre water spray fire extinguisher with fluorine-free additive is designed to provide professional fire protection against Class A and B fires.
Thanks to its MBK LIQ FFC premixed additive, it improves extinguishing efficiency while complying with current environmental standards related to fluorinated substances.

Certified NF EN 3-7+A1 (February 2008), this extinguisher guarantees safety, durability and regulatory compliance for professional, industrial and ERP environments.

Technical characteristics:
- Extinguishing agent: Water + fluorine-free additive
- Additive: MBK LIQ FFC premix
- Capacity: 9 litres
- Auxiliary gas: Nitrogen
- Pressure: Stored pressure - 15 bar
- Fire rating: 21A - 183B
- Operating duration: 52.09 seconds
- Operating temperature: +5°C to +60°C
- Standard: NF EN 3-7+A1 (02/2008)
- Vehicle bracket: No

Fluorine-free ecological extinguisher:
In a context of stricter regulations concerning fluorinated agents (PFAS), this water extinguisher with

fluorine-free additive is a sustainable and environmentally responsible solution. It combines high extinguishing performance with ecological safety without compromising operational efficiency.

Caractéristiques

- Volume : 9 litres
- Norme : NF EN 3-7+A1 (02/2008)
- Classe de feu : 21A - 183B
