Franco Garda Standard Sling □ Stretcher Accessory for Professional Rescue

Description

The Franco Garda standard sling is an essential accessory for the Franco Garda stretcher, designed to ensure safe and stable lifting during casualty transport and helicopter hoist operations. It allows for precise and controlled handling, reducing the physical effort of rescue teams.

Key Features:

- 4 ropes (10.5 mm) connected in a 2x2 configuration to a delta link
- 4 aluminum carabiners with automatic locking for quick and secure attachment
- Rope lengths without carabiners: front 70 cm / rear 60 cm
- Service life: 5 years from first use

Benefits:

- High load capacity (2,200 kg) for safe transport in all conditions
- Lightweight and easy to handle (800 g)
- Compatible with all Franco Garda stretcher models
- Provides stable and secure attachment for helicopter hoist or difficult terrain operations

The Franco Garda standard sling is ideal for mountain, canyon, aquatic, or rugged terrain rescue missions, offering safety, durability, and reliability for professional rescue teams.
