

## PNEUMATIC SINGLE WHEEL FOR FRANCO GARDA STRETCHER

<https://www.securhit.com/en/stretchers-and-rescue-carriers/1249-access-brancard-garda-mono-roue.html>

Low-Pressure Pneumatic Single Wheel for Franco Garda Stretcher - Easier and Safer Transport

### Description

The low-pressure pneumatic single wheel is an essential accessory for the Franco Garda stretcher, designed to facilitate casualty transport on all types of terrain. It attaches easily to the carry bars using the PFFG031 system, reducing the physical effort of the carriers and improving stretcher maneuverability during rescue operations.

#### Key Features:

- Lightweight and durable aluminum tubular frame
- Sliding mounting brackets with hooks for quick and secure installation
- Large-diameter wheel with low-pressure tire for smooth and stable transport, even on rough or uneven paths
- Can be installed with the casualty already secured in the stretcher

#### Benefits:

- Significantly reduces carrier effort
- Easier transport over difficult terrain, trails, and obstacles
- Increased patient comfort thanks to the low-pressure tire
- Compatible only with the PFFG031 carry system of the Franco Garda stretcher

#### Technical Data:

- Weight: 7 kg

The Franco Garda single wheel is the ideal accessory to optimize transport and evacuation in challenging environments while ensuring safety, comfort, and efficiency for rescue teams.

## Caractéristiques

- Weight : 7 kg
