Franco Garda Mixed Sling - Land and Water Stretcher Accessory

### Description

The Franco Garda mixed sling is an essential lifting and hoisting accessory for the Franco Garda stretcher, designed to provide stability and safety during land and water operations. Its design improves the balance between the stretcher and the rescuer during tandem hoisting, ensuring precise and secure casualty transport.

#### Key Features:

- 4 webbing straps (19 mm, 4 x 1) connected to a delta link for optimal stretcher balance
- 4 stainless steel carabiners with automatic locking for secure and quick attachment
- Adjustable rear straps: 60 or 65 cm to correct stretcher tilt depending on weight distribution
- Strap lengths without carabiners: front 70 cm / rear 60 and 65 cm
- Service life: 5 years from first use

#### Benefits:

- High load capacity (2,850 kg) for safe transport on all terrains
- Mixed design suitable for land and water rescue operations
- Optimized weight distribution reduces rescuer effort
- Compatible with all Franco Garda stretcher models

#### Technical Data:

- Weight: 1,140 g
- Load capacity: 2,850 kg

The Franco Garda mixed sling is the ideal accessory to enhance hoisting and evacuation operations,

providing safety, durability, and efficiency in all professional rescue missions.
