Cascade Rescue Professional Series Titanium Rescue Litter

Description

The Cascade Rescue Professional Series Titanium Litter represents the latest in construction and material technology for professional rescue operations. Designed for rescue and emergency response professionals, it combines lightweight design, durability, and strength, providing an optimal solution for patient transport and evacuation in the most demanding environments.

Lightweight and ultra-strong frame

The frame is made of commercially pure titanium, with a 19 mm tubular chassis, ensuring exceptional mechanical strength while remaining lightweight. This advanced design allows rescue teams to handle the litter easily, even in confined or challenging environments.

Safety and comfort for the patient

The litter features:

- Four patented Articulating Lift Points (ALP) for safe horizontal or vertical lifting.
- Four Quick Tab patient straps for secure patient fixation.
- Integral padded anatomical back support for patient comfort and stability.
- High-density polyethylene mesh floor, durable and easy to clean.

Removable version for transport

The two-piece version features the Cascade FastLock system, allowing rapid assembly and disassembly in approximately 10 seconds, making transport and storage in the field quick and convenient.

Technical Specifications

- Length: 211 cm (83")
- Width: 63.5 cm (25")
- Height: 20 cm (8")
- Internal Depth: 16.5 cm (6.5")
- Weight (1-piece version): 7.9 kg (17.5 lbs)
- Weight (2-piece version): 8.4 kg (18.5 lbs)
- Frame: commercially pure titanium tubular chassis

- Lift Points: 4 patented ALP articulating points
- Patient Straps: 4 Quick Tab straps
- Floor: high-density polyethylene mesh Ideal for professional rescue operations

The Cascade Rescue Professional Series Titanium Litter is perfect for specialized rescue teams, firefighters, industrial units, and emergency organizations, offering a unique combination of lightweight design, strength, and safety, essential for efficient and reliable patient transport and evacuation in all conditions.
