Cascade Rescue Professional Series Stainless Rescue Litter

Description

The Cascade Rescue Professional Series stainless steel rescue litter is designed for professional rescue and intervention teams. Robust and versatile, it is suitable for technical rescue operations, evacuation, and patient transport, including use by fire departments, specialized rescue teams, technical rescue units, and industrial interventions.

Its frame is made of a 19 mm tubular chassis reinforced with 9.5 mm crossbars, providing excellent mechanical strength. The entire structure is coated with a powder coating finish, ensuring high durability and resistance to harsh outdoor conditions.

The litter features four patented Articulating Lift Points (ALP) for safe horizontal or vertical lifting. It also includes four Quick Tab patient straps, an anatomically contoured padded back support for patient comfort, and a high-density polyethylene mesh floor for maximum durability.

Removable version for transport available on request

The two-piece version features the Cascade Toboggan FastLock system, allowing rapid assembly and disassembly in approximately 10 seconds, facilitating transport and storage during operations.

Technical Specifications

- Length: 211 cm
- Width: 63.5 cm
- Height: 20 cm
- Internal Depth: 16.5 cm
- Weight (1-piece version): 11.6 kg
- Weight (2-piece version): 12.5 kg
- Frame: stainless steel with powder coating
- Lift Points: 4 patented ALP articulating points
- Patient Straps: 4 Quick Tab straps
