CONREST KIT Compact Rescue Stretcher - Confined Space Rescue

Description

The CONREST KIT rescue stretcher is specially designed for operations in confined or hard-to-reach spaces. Its compact and robust design ensures effective stabilization of the head, spine, and pelvis, providing safe patient transport even in the most challenging conditions.

Key Features of the CONREST KIT
- Efficient rescue in confined spaces: Its short construction secures the head, spine, and pelvis with strong stabilizing straps, ideal for hard-to-access areas.
- Quick and intuitive handling: Multiple handles and orange-coded anchor points allow easy setup and provide versatile options for patient transport.
- Maximum safety and durability: The sturdy sliding plate ensures secure movement of the patient over edges and obstacles.
- Compatible with rigging systems: Transport loops allow attachment of special suspensions for rescuing victims from shafts, manholes, or deep areas.

Technical Specifications
- Material: Durable polyester
- Standard: EN 1497:2007
- Operating temperature: -35 °C to +45 °C
- Color: Orange and black
- Net weight: 8.55 kg
- Gross weight: 10.57 kg
