CONREST PRO+ KIT - 2-in-1 Rescue Stretcher

Description

The CONREST PRO+ KIT is a versatile rescue stretcher designed for the safe and efficient transport of injured persons. Its 2-in-1 functionality allows use as a half-stretcher or a full stretcher, suitable for operations in confined spaces, rough terrain, or complex rescue scenarios. The lightweight and robust construction, combined with a padded lying surface, ensures comfort and safety during transport.

Key Features
- 2-in-1 Functionality: Enables modular use depending on the rescue scenario□half-stretcher for confined spaces or full stretcher for standard horizontal transport.
- Comfort and Safety: Padded lying surface and integrated sliding plates allow smooth transport across all types of surfaces, reducing the effort required.
- Intuitive Handling: Reflective materials, color-coded fasteners, and flexible attachment options ensure safe and quick operation, both horizontally and vertically.
- Enhanced Stability: Integrated leg extension improves stability and ergonomics during transport.

Technical Specifications
- Application Areas: Rescue, work in confined spaces
- Service Life: 10 years
- SEAL PAC Compatibility: Yes
- Operating Temperature: -35?°C to 60?°C
- Material: Various, durable and lightweight
- Standard: EN 1497:2007
- Size: One size
- Net / Gross Weight: 11.50 kg

Applications
- Rescue operations in confined spaces
- Interventions on rough terrain or at height

- Safe and modular transport of injured persons

Caractéristiques

- Weight : 11.50 kg
- Norme : EN 1497:2007
