Compact screen nozzle / 100L/min / Female GFR inlet PN40

Description

The compact water curtain nozzle is used for fire protection of tanks and sensitive equipment, particularly against:
- Radiant heat
- Spark projections
- Risks associated with industrial and petrochemical environments

Technical specifications:
- Flow rate: 100 L/min at 6 bar
- Material: OAD aluminum alloy, robust and corrosion-resistant
- Design: Striated aluminum diffusion plate for a stable jet, even under difficult weather conditions
- Integrated handle for easy handling
- Ground stabilization system with deployable stabilizing legs
- Compact design allowing belt transport once the stabilizing legs are folded

This water curtain nozzle combines hydraulic performance, stability under all conditions, and ergonomic design, making it an essential tool for protecting sensitive installations.

Caractéristiques

- Weight : 0.570 KG
- Encombrement plié : 134 (L) x 60 (l) x 70 (H) mm
- Encombrement déplié : 137 (L) x 227 (l) x 70 (H) mm
