A.R.I. Checkpoint Control Board - Breathing Apparatus Entry Control and Personnel Tracking System

Description

The A.R.I. Checkpoint Control Board is an essential tool for managing and monitoring personnel operating with Self-Contained Breathing Apparatus (SCBA) in hazardous environments. It enables the centralized management of accountability tags, monitoring of entry times, and tracking of personnel deployed within the risk area.

Designed to improve operational safety and organization, the A.R.I. Checkpoint Control Board provides a clear overview of team deployment and engagement duration, helping supervisors maintain effective personnel accountability during emergency operations.

All components are conveniently stored within a single protective carrying case, ensuring rapid deployment and easy transport. The kit also includes an additional magnetic whiteboard for operational notes, tactical sketches, and incident management information.
With its compact design, multiple mounting options, and magnetic features, the A.R.I. Checkpoint Control Board is ideally suited for demanding emergency response environments.

Key Features
- Monitoring of SCBA wearer entry and engagement times
- Rapid personnel accountability and tracking
- Centralized management of accountability tags
- Magnetic control board for efficient organization
- Additional magnetic whiteboard for notes and operational sketches
- Digital clock included for accurate time monitoring

- Magnetic protective carrying case
- Multiple mounting options: magnetic surface, cord attachment, or handle
- Comfortable shoulder strap for transport

Complete ready-to-use kit
Kit Contents
- 1 magnetic A.R.I. control board
- 1 magnetic whiteboard
- 10 accountability tags
- 6 magnets
- 4 dry-erase markers
- 1 digital clock 1 magnetic protective carrying case
- 1 compartmented storage pouch

Technical Specifications
- Board dimensions: 400 × 400 mm
- Number of accountability tags: 10
- Number of magnets: 6
- Number of markers: 4
- Digital clock included
- Magnetic protective carrying case
- Integrated storage pouch
- Shoulder strap carrying system
- Mounting via cord, handle, or magnetic surface

Caractéristiques

- Dimensions du tableau : 400 x 400 mm
