RIT PACK ONE - Emergency Air Supply Rescue Bag

Description

The RIT PACK ONE is an emergency air supply rescue bag specifically designed to provide breathable air assistance to distressed responders and victims during rescue operations in hazardous environments. Developed with real-world operational experience, this rescue bag is designed to transport the essential equipment required for search, rescue preparation, victim extraction, and evacuation to a safe area. Its quick-adjustment system accommodates 6 to 9-liter air cylinders, providing maximum flexibility to meet operational requirements.

Designed for demanding emergency situations, the RIT PACK ONE features multiple drag and carry handles for easy transportation and deployment in confined or challenging environments. The dedicated face mask compartment includes a highly visible handle that can be easily identified in low-visibility conditions, while a second ergonomically designed handle provides rapid access to the cylinder valve and air hose, even when wearing gloves.
Its rugged construction, combined with high-visibility and durable materials, ensures excellent performance, long service life, and rapid identification in smoke-filled or low-light environments. The RIT PACK ONE is a reliable and efficient solution for rescue teams requiring emergency air supply capabilities and organized transport of critical rescue equipment.

Key Features
- Emergency air supply rescue bag
- Compatible with 6 to 9-liter air cylinders
- Quick-adjustment cylinder retention system
- Dedicated face mask compartment with low-visibility identification handle
- Rapid access to cylinder valve and air hose while wearing gloves - Multiple drag and carry handles for easy transport
- Replaceable reinforced rigid shell
- Multiple storage pockets for rescue equipment and accessories - High-visibility and highly durable materials
- Multiple carrying configurations for operational flexibility

Technical Specifications
- Dimensions: 87 x 28 x 25 cm
- Material: PES 1680 fabric with reinforced plastic shell
- Net weight: 5 kg
- Compatible with 6 to 9-liter air cylinders
- Replaceable rigid shell
- Multi-purpose carrying strap
- Supplied without air cylinder
- Includes 2 carabiners

Storage and Organization
The RIT PACK ONE features multiple compartments and storage pockets designed to keep rescue equipment organized and readily accessible during emergency operations.
- Dedicated breathing mask compartment
- Quick access to air hose and cylinder valve
- Multiple storage pockets of varying capacities
- Suitable for rescue and extraction tools
- Optimized organization for rapid deployment

Rugged Operational Design
Built for use in demanding emergency environments, the RIT PACK ONE combines durability, visibility, and ergonomics to support rescue teams during critical operations.
- High-visibility materials
- Heavy-duty PES 1680 fabric construction
- Reinforced shell for enhanced equipment protection
- Multiple drag handles
- Adaptable carrying configurations
- Designed to facilitate movement and navigation during rescue operations
