GOC Command Case - Mobile Incident Command Post for Operational Management

Description

The GOC Command Case is a mobile incident command post designed to enable the rapid deployment of a fully functional coordination center as close as possible to the operational area. It serves as a reliable decision-support tool for incident commanders and operational leaders, allowing efficient organization, tracking, and coordination of field operations in real time.
Equipped with a large customizable blank command board and extensive storage capacity, the GOC case centralizes all essential tools required for operational management, command, and team coordination on site.
Designed for emergency response and crisis situations requiring immediate action, it supports effective management of complex incidents such as fires, natural disasters, major accidents, large-scale rescue operations, and critical events.
Its rugged and waterproof construction ensures maximum protection of equipment even in harsh environments. Certified to IP67, the case provides complete protection against dust and water, including temporary immersion. The command board can be customized upon request to meet specific operational requirements and procedures.

Key Features
- Rapidly deployable mobile incident command post
- Close-to-scene operational command capability
- Large customizable blank command board
- Designed for operational management and incident command - High-capacity storage for tools and documentation
- IP67 certified waterproof protection
- Full protection against dust and water ingress
- High resistance to harsh environments

- Heavy-duty impact-resistant polypropylene shell
- Suitable for indoor and outdoor operations

Technical Specifications
- Color: Black
- Weight: 13 kg
- Material: High-impact resistant polypropylene
- Reinforced thick walls
- Internal dimensions: 800 x 370 x 140 mm
- Case height / lid height: 95 + 45 mm
- Integrated sealing gasket
- Protection rating: IP67
- Fully dustproof
- Waterproof up to 1 meter immersion
- Temperature resistance: -30°C to +90°C
- Adjustable tripod height: 93 to 143 cm

Equipment
- Blank command board
- Heavy-duty waterproof case
- Adjustable tripod stand
- Customizable surface available on request
- Integrated storage space for operational tools
