A.R.I. Checkpoint Control Board with 5 Timers - SCBA Accountability and Personnel Tracking System

Description

The A.R.I. Checkpoint Control Board with 5 Timers is a complete accountability and tracking solution designed for monitoring personnel operating with Self-Contained Breathing Apparatus (SCBA) in hazardous environments.
The board allows centralized management of accountability tags, monitoring of SCBA wearer deployment times, and tracking of personnel operating within the risk area. Equipped with 5 integrated timers, it enables supervisors to monitor multiple teams simultaneously, improving operational control and enhancing personnel safety during emergency response operations. All components are conveniently stored within a single carrying case for easy transport, storage, and rapid deployment. The kit also includes an additional magnetic whiteboard for operational notes, tactical sketches, and incident management information.

Compact, durable, and easy to deploy, the A.R.I. Checkpoint Control Board with 5 Timers is an essential tool for improving accountability, coordination, and operational efficiency during incident response.

Key Features
- Simultaneous monitoring of multiple teams with 5 integrated timers
- SCBA wearer entry time tracking and accountability management
- Quick visual overview of personnel operating in hazardous areas - Magnetic accountability control board
- Magnetic dry-erase whiteboard for notes and tactical sketches - Digital clock included
- Magnetic protective carrying case
- Mounting on metallic surfaces
- Hanging option via handle or cord

- Comfortable shoulder strap for transport

Complete ready-to-use kit
Kit Contents
- 1 A.R.I. Checkpoint Control Board
- 5 integrated timers
- 10 accountability tags
- 6 magnets
- 4 dry-erase markers
- 1 digital clock
- 1 magnetic whiteboard
- 1 magnetic protective carrying case
- 1 compartmented storage pouch

Caractéristiques

- Dimensions : 400 x 400 mm
