Fast Board - Rapid Rescue and Evacuation Board

## Description

The Fast Board is a rescue board designed for the rapid evacuation of a casualty or distressed responder. Compact, robust, and highly maneuverable, it facilitates rescue operations in confined spaces, stairways, on ladders, and across various types of terrain.
Its dedicated design provides excellent stability during movement, while the Kevlar towing system and single attachment point simplify handling and extraction procedures. The Fast Board can also be used for vertical rescue operations.

Key Features
- Suitable for confined spaces and restricted access areas.
- Slides easily over all types of surfaces, stairs, and ladders.
- Compatible with vertical rescue operations.
- High-strength Kevlar towing strap and pulling line.
- Large handles designed for use with protective gloves.
- Easy maintenance with removable components.

Technical Specifications
- Dimensions: 115 x 45 x 10 cm (L x W x H)
- Weight: 10.3 kg
- Side edges: 15 cm with a 45° angle
- Towing strap: 100% Kevlar  2,500 daN
- Pulling line: Kevlar, Ø 7.5 mm  8 m length
- Handles: 20 cm wide
- Single attachment point for simplified towing operations
- Maintenance: Washable with soapy water; removable and replaceable components

The Fast Board provides an efficient solution for rescue, extraction, and evacuation operations where

speed, safety, and maneuverability are essential.
