Cross Pro - Modular Gear Bag Transforming into a Mobile Equipment Station

Description

The Cross Pro is a next-generation gear bag designed for rescue, emergency response, and operational safety professionals. Its unique design allows it to transform into a fully functional mobile equipment station, providing a clear and immediate overview of all carried gear.
Engineered for field efficiency, it enables fast access to equipment, intuitive organization, and significantly reduces the risk of loss or forgotten items. Its modular internal layout and multiple attachment points make it a complete solution for transporting and managing operational equipment. Ergonomic and highly durable, the Cross Pro ensures comfortable carrying even under intensive conditions, with the added ability to mount additional bags from the Cross range directly onto the shoulder straps in a front-carry position.

Key Benefits
- Transforms into a mobile equipment station for full gear visibility
- Saves time during operations
- Protects equipment effectively
- Reduces loss and misplacement of gear
- Comfortable, ergonomic, and stable carrying system
- Modular attachment system compatible with the Cross range

Internal Layout
- 6 modular mesh compartments on the sides
- Pockets identified with labeled tags
- 1 external-access pocket without opening the bag
- 20 attachment points for carabiners and accessories
- 2 cross straps for securing rope or harness

- 1 elastic-cross storage section for equipment organization
- 2 transparent document pockets

External Features
- 6 external carabiner attachment points
- 4 high-strength load-rated loops (including 2 on shoulder straps)
- Heavy-duty YKK zipper closure
- 1 transparent identification pocket
- Integrated helmet attachment kit
- Padded, ergonomic, and adjustable back panel and shoulder straps

Carrying System
- Ergonomic adjustable back and shoulder straps
- 2 side handles (rated 200 kg)
- 2 central handles (rated 200 kg)
- 1 rear handle (rated 200 kg)
- 1 hoisting and helicopter lifting sling (rated 200 kg)

Applications
The Cross Pro is ideal for operations requiring structure, speed, and immediate access to equipment: rescue missions, fire response, operational safety tasks, technical interventions, and high-demand environments.

Caractéristiques

- Capacity : 54 L
