The professional electric hose reel for fast and efficient fire hose winding.

Description

The ET-Roller 6 is a professional electric fire hose reel designed to make winding fire hoses faster and easier after an intervention or training exercise. Equipped with a 660 W electric motor, it allows fire hoses to be wound quickly and efficiently, whether dry or wet, while significantly reducing the physical effort required from operators.

Compact, robust and foldable, this electric fire hose reel is particularly well suited to the needs of firefighters, emergency services and fire safety professionals.
Its electric drive system operates using two 18 V Milwaukee batteries (not included), providing excellent freedom of movement in the field without the need for a mains power connection. The ET-Roller 6 features a removable support for holding and winding the hose. It is available in two configurations: with a support suitable for hoses up to 3" or with an A110/4" drum support for hoses up to 4".

Thanks to its REVERSE function, the unit can also unwind an already wound hose in a controlled manner. It can also be used to help drain water from hoses. Its foldable and deployable frame provides good stability during operation while making transport and storage easier.

Technical Specifications
- Motor power: 660 W
- Motor type: DC electric motor
- Power supply: 2 x 18 V Milwaukee batteries (not included)
- Compatible hose diameter: Up to 4"
- Winding support: Removable, depending on the selected configuration
- 3" version: "2 Forks" support
- 4" version: A110/4" drum support
- Operation: Electric winding and reverse unwinding
- Applications: Dry and wet hoses, hose draining
- Dimensions when deployed (L x W x H): 480 x 360 x 1,230 mm
- Folded dimensions (L x W x H): 480 x 270 x 930 mm
- Weight: 36.5 kg (excluding hose and batteries)

- Frame: High-strength steel
- Finish: Powder-coated or galvanised

Please note: The two 18 V Milwaukee batteries required to operate the ET-Roller 6 are not included. The battery charger is also not included.
