Phoenix Silkflame

Description

The Phoenix Silkflame has been especially developed for use during firefighting exercises. The powerful ventilator is suitable for use in combination with high concentrations of training smoke. This silk flame is suitable for both vertical and horizontal use. Ideal for simulating more complex fires in situations where no real fire is desired.
The flame cloth□s rolling system is unique. The height of the flame is therefore adjustable between 0 and 200 cm. The LED lighting is easy to tilt, allowing for the most optimal result to be achieved with any flame height. All the metalwork consists of top quality stainless steel. The entire silk flame is built into a Euronorm case as standard. This results in a great deal of convenience during storage and transport. Open up the lid and off it goes! The detachable power cord is easy to replace in case of any wire breakage.
Case dimensions: 60 x 40 x 32.5 cm.

Caractéristiques

- Flame height : Réglable entre 0 et 200 cm
