FLAME SIMULATOR MINI SILKFLAME LED

https://www.securhit.com/en/fire-simulation/16-simulateur-de-flamme-mini-silkflame-led.html

Simulates a small fire

Description

A silkflame imitates a seat of fire with the combination of a silk cloth, lights and a ventilator. A realistic flame is created in less than no time. It is matter of connecting the plug to the power point and pressing the start button.
The flame of this Mini Silkflame is 30 cm high. As a result this flame is very suitable for exercises for emergency response officers. Place the Mini Silkflame for example in a wastepaper basket or cupboard. Or simulate a fire in a paper container, a fire in the pan scenario or a fire above a system ceiling. Also ideal as a surprise effect or for post reconnaissance.

Caractéristiques

- Dimensions : 23 x 18 x 17 cm
- Voltage : 12 V
