

ECOLINE CRIMPING PRESS

<https://www.securhit.com/en/fire-hoses-and-accessories/161-presse-a-sertir-ecoline.html>

Versatile and durable crimping press

Description

The Ecoline crimping press sets an unbeatable benchmark for quality and cost efficiency thanks to its innovative narrow design, ease of use, versatility and long service life.

The compact design allows for ergonomic working in the workshop. The use of robust base jaws allows all types of fittings to be crimped and the proven lubrication-free plain bearing technology reduces maintenance costs.

The large opening distance allows simple crimping of yoke valves without removing the crimping jaws. Thanks to its compact design it fits in any workshop and is ideal for on-site service.

Plain bearing technology:

- Lubricant-free - for greater cleanliness and longer machine life
- Maximum productivity with extremely low operating costs
- No contamination of the hose with grease
- Also ideal for the food and pharmaceutical industries
- Reduces the loss of compression force by up to 20
- Stable process accuracy and repeatability

Conforms to CE standard

Caractéristiques

- Dimensions : 420 x 535 x 520 mm
- Weight : 92 kg (sans groupe électrogène)
- Total weight : 92 Kg (sans huile)
