SoundBox V3

Description

This sound box includes a license to use over 45 FireWare sound effects specifically designed for staging. Confront participants with a collapse behind them or an explosion somewhere in the building. The SoundBox V3 is water resistant (IP65) and very robust. This makes it ideal for adding sound effects to exercises involving water. The box is fully waterproof and the cover protects the control buttons and the display. The advanced menu structure and clear display make it easy to find the right sound. It is even possible to put the sounds in a particular order using a playlist. By placing multiple SoundBoxes in a Wi-Fi network, you can create an extremely realistic sound experience during exercise. And as an instructor, you can control all the sounds with one app! The great advantage of Wi-Fi is that the distances that can be covered during an exercise are several times greater than with Bluetooth. The SoundBox V3 comes in a plastic case with a matching foam interior. The supplied battery charger can also be stored in the case.

Caractéristiques

- Weight : 2.3 kg
- Language : Français (sur demande pour une autre langue)
